“On-the-Water” Pollution Talk

Float, listen, and learn as we explore the waters of Glade Run Lake to understand how human activities impact water quality. This on-the-water talk will guide participants through the causes of water pollution, its effects on wildlife and ecosystems, and what we can do to protect our local waters. Experience the problem firsthand while learning about solutions. Join Lulu from Full Psych Adventures as she guides you around the lake.

Please bring your own watercraft (if you have one).

If you don't have one... no worries. You can still participate by using one of the kayaks or paddleboards that Full Psych will be supplying for the program. *A limited supply will be available. Registration is required.
